

**Kidneys in the Classroom is a health education and prevention program provided by the National Kidney Foundation of Northeast New York**

The program is designed to teach school age children about their kidneys and Chronic Kidney Disease (CKD). The program uses popular education methodologies that are visual and interactive. The curriculum addresses all learning styles and is 45 minutes in length. Topics discussed include a description of the kidneys, the "job" of the kidneys, the leading causes of kidney disease which includes diabetes and high blood pressure, nutrition, and making good choices for kidney health.

The program is provided by National Kidney Foundation Staff and Medical Volunteers.

Northeast Kidney Foundation  
99 Troy Road, Suite 200  
East Greenbush, NY 12061
